7. LENGTH OF OBSERVATION 10 minutes	8. NUMBER OF OBJECTS one	9. COURSE varied	
10. BRIEF SUMMARY OF SIGHTING Elliptical obj estimated at 10ft x 20ft. A "real flying saucer." Aluminum, speed fast & then slow. Observed at alt of one mile descending to 13 ft. Direction of travel NE. Color silver. Rose by secret method of jerks & flops. No sound until obj exploded. 10 min obsvation during daylight. Made seven attempts to land in a field 500ft fm witness & then halted one ft above the ground where it remained motionless for exactly 5 mins. At this time a red glow started at 1 end & when the entire obj was glowing		11. COMMENTS it then exploded. Witness ran away. Has told everyone in the neighborhood but can't convince anyone it wasn't an hallucination. Apparently the witness believes that he saw an obj of some sort. No attempt at a hoax is indicated. If the event depicted actually happened, there would have been some remains fm the fire or explosion, if nothing more than charred ground. Case listed as Other, psychological causes rather than hoax, since the witness is convinced that obj was actually there.

Sir:

Please send me a copy of the Standard Air Force questionnaire regarding sightings of flying saucers. Also send me the more detailed questionnaire, Form A and Form B, comprising 10 pages of questions. I am answering these questionnaires because of the fact that, on March 31, 1958, that I saw, or saw flying saucers. I believe you will find some of the information on that sighting.

Date: 10/31/58.

Time of sighting: 16:50 - 17:00.

Size: height: 10'; width: 20'.

Shape: elliptical.

Composition: two metal "plates" placed together and joined to each other by a ring around the center of the cup. The surface appeared to be made of aluminum or a substance greatly resembling aluminum.

Speed: fast, then slow.

Altitude: 1 mile, gradually dropping to 17 feet.

Direction of travel: southeast to northwest.

Movement pattern: straight line, except for change in altitude accomplished by a slow ascent and descent - rapid take and drop.

Color: silver.

Sound: none, that is, until it exploded.

Length of time in sight: 10 minutes.

Length of time to sound: 10 minutes (please turn over)

H.B. The sketch that I have been laboring on of the
Hymn source, it appears to have it wrong.
October 31, 1958. It will give you an idea of what
the source looks like.

"The Lower"

I am certain that the above diagram does not represent an enemy aircraft, a missile, any other aircraft, a balloon, a meteorological phenomenon, an astronomical phenomenon, a reflection, or a figment of the imagination.

Yours very truly,
